

DMR - Rapid Target Engagement

September 2, 2023 - Como, MS

Rapid Target Engagement is a 1-Day (8 hour) training course from our Designated Marksman Rifle (DMR) series designed to challenge and improve the shooter's skills and abilities with a precision scoped carbine at distances up to 500 yards. Instruction and drills are focused on the improvement and application of practical scoped carbine skills in order to develop capable designated marksmen. This course builds on the fundamentals established in

our Scoped Carbine Clinic. It is intermediate to advanced level and requires shooters to arrive with the fundamental ability to successfully engage mid-size targets out to 500 yards. Starting from this point, we apply those fundamentals in drills designed to build skills useful for practical engagement scenarios at speed. As a DMR training course, all targets will be mid-size steel at distances of 100 to 500 yards. Skills

covered included rapid single-target engagement, multi-target engagement, and a real-world evaluation of holding vs dialing. This is an ideal training evolution for military/LE designated marksmen, snipers, or competitive shooters. Please note the prerequisite for this course: **successful completion of Zero Theory's Scoped Carbine Clinic or substantially similar training AND demonstrable ability to engage mid-size targets at known distances up to 500 yards on-demand.**

Price: \$200.00
